COMPANY PROFILE

mitsui & co.
PROJECT SOLUTIONS

CEO message

MITSUI & CO.
PROJECT SOLUTIONS

In October 2024, we changed our company name from “Mitsui & Co. Plant Systems, Ltd.” to “Mitsui & Co. Project Solutions, Ltd.” This new trading name symbolizes our determination to provide solutions in a constantly changing business environment, and to expand our contribution to all stakeholders, including our customers, suppliers, partners, and beyond, to all of society.

In the past we have met our customers’ needs primarily by supplying plant and equipment in infrastructure fields, such as electric power, steelmaking, transportation, and chemicals. We have expanded our business to include initiatives in fields from renewable energy power generation and power supply to convenience stores. Going forward, we will further diversify our business actively taking up the challenge of providing solutions through business investment and various service business.

Our policy concerning decarbonization, which is a major social priority, is to provide solutions and develop business, including further development of renewable energy, CO₂ capture, and the operation of facilities that will contribute to the creation of supply chains for ammonia and hydrogen as next-generation fuels. We will also focus on energy management and recycling business.

We will dedicate ourselves to providing solutions for the future of infrastructure and the realization of our corporate mission to bring reliable safety and security to every corner of society, as set forth in our corporate MVV.

President & Chief Executive Officer

Tadateru Tanigaki

Mission • Vision • Values

MITSUI & CO.
PROJECT SOLUTIONS

We have defined our mission, vision, and values (MVV) as an expression of our determination to contribute to solving social issues, including the realization of a decarbonized society, and to provide enhanced value to our stakeholders.

Mission

Bring reliable safety and security to every corner of society

Support every person, community, and society with dependable infrastructure.

Vision

Provide solutions for the future of infrastructure

Shape optimal infrastructure toward driving decarbonization and solving other social issues.

Values

Challenge

Boldly rise to the challenge and open up paths to the future.

Consolidate

Respect diversity and consolidate the power of individuals.

Persevere

Give it our all and persevere through to the end.

With integrity

Ensure integrity for ourselves, our business, and society.

We are continually working on transforming our business models to become a more attractive company to all of stakeholders. Our company's thoughts are reflected in our new brand vision.

Keep changing for an ordinary but precious life

Keep changing for an ordinary but precious life

There are things that should remain the same, no matter how times change.

- A life with electricity whenever you need it
- Decent transportation systems
- Rich water resources
- Beautiful landscape we want to leave for the future
- Ordinary, but happy and peaceful days

That's why Mitsui & Co. Plant Systems Ltd. will change.

We will change to keep our precious things unchanged.

We will reform our business models, actively pursue business investments,
and take many more bold initiatives.

Toward realizing a decarbonized society, we have numerous ideas and approaches to explore.

- Creation of renewable energy from solar and wind power
- Conversions to the next-generation fuel using ammonia and hydrogen
- Recycling resources

While there are still many issues left unanswered,

Mitsui & Co. Plant Systems Ltd. is determined to take on the challenges.

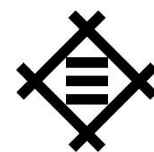

We are standing at the starting line.

Take a step forward.

Let's change.

So that we can keep our stable ways of living unchanged.

Solutions

MITSUI & CO.
PROJECT SOLUTIONS

Mitsui & Co. Project Solutions

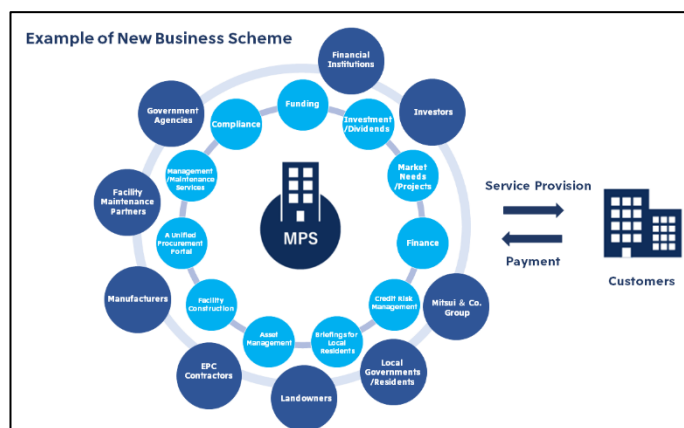

- Creating Values with New Business Models to Solve Social Issues

The infrastructure sector needs to address a growing range of issues, including environmental problems, the falling birthrate and the aging population, and to take precautions against increasingly serious natural disasters. One of the most urgent challenges is the achievement of carbon neutrality as a step toward net-zero emissions of greenhouse gases.

Mitsui & Co. Project Solutions is working to provide solutions to these social issues by creating new business based on our conventional expertise as a trading company specializing in infrastructure and machinery, our collaboration with Mitsui & Co. Group companies, and our networks spanning entire supply chains, as well as our business investment activities and various service business.

New Business

The environment surrounding our society is changing every minute, and business also needs to evolve in step with these changes in the societal environment. MPS uses its networks with various industries and financial institutions to provide total support at all stages from the formation of schemes for new projects, to financing, development, and operation. We create business with high profitability that are in line with current trends.

01 Onsite and Offsite PPAs 02 High-Voltage Power Supply/Solar Power Generation Services

03 Fuel Ammonia

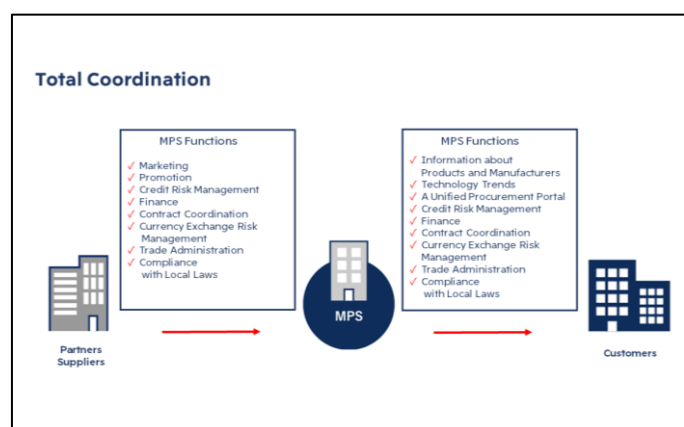

04 Carbon Capture and Storage

Total Coordination

Our total coordination role encompasses procurement from manufacturers and EPC contractors, business-related support, such as financing, credit risk management, contract coordination, trade administration, and compliance with industry laws, as well as coordination with stakeholders in various fields. We also use the expertise and networks of Mitsui & Co. Group to provide solutions for a wide range of customer needs.

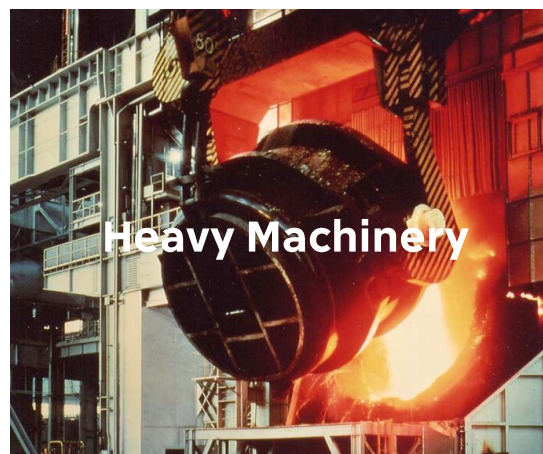

Business Fields

MITSUI & CO.
PROJECT SOLUTIONS

Products handled by MPS include facilities, equipment, and parts for basic infrastructure and core industries, covering sectors such as electric power, transportation, steelmaking and chemicals. Our activities center on the procurement of these facilities, equipment, and parts, but we also offer a wide array of services to meet the needs of our customers, including finance, logistics, installation, maintenance, and the provision of technology, as well as services provided to retail chains through facilities and equipment. In addition, we develop and operate renewable energy power generation schemes, carry out studies concerning commercial initiatives in such areas as energy conversion and efficiency improvement, and offer wide-ranging solutions for decarbonization and other social priorities.

Electric Power

01 Contribution towards stable power supply

Electric power systems are core energy infrastructure. We contribute to the stable supply of electric power by using our domestic and overseas networks to supply the most advanced equipment, parts, and materials for power stations, transmission networks, substations, and other facilities, and by providing maintenance services.

We also offer a wide array of services for our customers based on our extensive experience and knowledge, including support for safety measures in preparation for the restart of nuclear plants, the proposal of efficiency improvement measures based on the IoT, the procurement of the biggest boilers in the world and other equipment, and the transportation of heavy machinery required with the construction or renovation of large-scale power plants.

02 Total solution services

We provide optimal power supply solutions for convenience stores by combining various approaches, including the installation of high-voltage substation and solar power equipment. We also offer efficient one-stop support services for operation and maintenance of various facilities, while providing total electric power supply solution services that contribute to a reduction in electric power charges.

03 Next-generation energy solutions

We contribute to the creation of systems to flexibly and effectively respond to continual changes in electricity demand in connection with dramatic shifts in the market environment, such as electricity deregulation. We aim to provide our customers with comprehensive services beyond equipment sales, covering: 1) the supply of electricity and heat for rural/urban areas, and the direct supply and sale of electricity to companies with added value on a local production/local consumption basis; 2) in-house generation and cogeneration systems; and 3) energy management systems, virtual power plants, and demand response systems based on combinations of storage batteries, fuel cells, and other technologies.

Heavy Machinery

02 Iron and steel production facility solution provider

MPS has built a record of achievement as an iron and steel production facility solution provider by making optimal use of its extensive experience, knowledge, and information resources. Our advantages in this area include our on-site response capabilities, the relationships of trust that we have built with our customers, and our wide-ranging business relationships with numerous manufacturers in Japan and overseas. In the area of import transactions, in particular, we are developing the Japanese market in close partnership with European manufacturers that possess the most advanced, unique technologies, and have received high evaluation from our customers on our adjustment capabilities that go beyond the barriers of different languages and commercial practices through exertion of *sogo shosha* functions.

01 With the iron and steel industry

Our iron and steel manufacturing business aims to be number one in terms of total capabilities, including technological superiority. We place the highest priority on the stable supply of steel products (core materials), and to do so, we strengthen production infrastructure, and also develop and engage in overseas production business for high-grade steel, especially automotive steel. In response to the needs of iron and steel manufacturers in Japan and overseas, MPS have been delivering key iron-making facilities and equipment at every stage, from receipt of materials to reduction, refining, casting, and rolling, contributing to various benefits of customers, including reduction in production costs, improvement in productivity, and implementation of environmental countermeasures.

03 Creating new added values

While focusing on the iron and steel industry to further strengthen the advantages that we have accumulated to date, MPS also will respond to the environmental changes of the iron and steel industries in Japan and overseas and create new added values as a group of professionals, in addition to our traditional role as a supplier of facilities and equipment.

While leveraging the comprehensive strengths of the Mitsui & Co. group, we will take on challenges in areas beyond the Japanese iron and steel industry and steel-making facilities, including the IoT, power generation, environmental countermeasures, and 3D printers.

Transportation

01 Contributing to reliable railway operations

We import the latest, high-performance track maintenance machines, as well as railway rolling stock products, and parts and materials for tracks and electrical facilities, and sell these products to railway operators throughout Japan. By providing foreign-manufactured machinery and products, we are contributing to passenger comfort, reliable railway operations, and efficient maintenance on both Shinkansen and conventional lines. We will continue to contribute to safe, reliable railway operations by introducing excellent overseas products to meet customer requirements, and by guiding manufacturers to introduce design and functional modifications to satisfy Japanese requirements.

02 Urban transportation systems for Japanese and overseas markets

We have taken the initiative in coordinating various monorail projects throughout Japan from planning through to construction, including the Osaka Monorail, the Tokyo Monorail, and the Okinawa Urban Monorail. Internationally, we have participated in a monorail construction project in Chongqing City, China, and also supplied electrical systems and other parts for Japanese-made rolling stock for subway projects in the Chinese cities of Beijing and Chengdu.

We have also worked on various projects with Mitsui & Co., including the supply of track maintenance equipment and rolling stock parts in Europe, Africa, South America, and India. We will continue to contribute to the advancement of urban transportation and freight logistics worldwide.

03 Challenges towards the next-generation mobilities

Based on the import and sales of articulated buses that we are currently engaged in, we will actively pursue opportunities in relation to the next-generation transportation systems, for which a variety of technological innovations are expected, including the introduction of alternatives to gasoline and other fuels, and the development of autonomous driving technology. We will continue to take up the challenge of creating a human-friendly, environment-friendly society through the development of these transportation (mobility) systems.

Infrastructure Projects

01 Contributing to project realization

In order to support the development and implementation of a wide range of infrastructure and industrial projects, such as energy and petrochemicals, MPS provides various services to meet project requirements, including the supply of plant facilities and the arrangement of process licenses and finance. In addition to these fields, we will meet all requirements in various other areas, including the lifestyle infrastructure field (healthcare, food, and agriculture) that is expected to become increasingly

02 Solutions for all project needs

We contribute to the successful realization of projects by providing the products and solutions needed for project development and implementation in wide variety of core industrial and infrastructure fields, such as energy, petrochemicals, and water treatment. By making optimal use of the partnerships with customers and manufacturers we have built in Japan and overseas, and our accumulated experience and achievements, as well as the shosha functions (global networks, business investments, and financing) of Mitsui & Co., we offer a full range of services, including the supply of plant and facilities, and the arrangement of process licenses and finance.

03 Challenges in new fields

We aim to create new business targeting business areas of batteries, new materials, food, and healthcare, whose markets are expected to grow globally. We will use the comprehensive strengths of the Mitsui & Co. group to discover a variety of needs throughout the world, while supporting our customers and partners in Japan and overseas to respond to changing industry structures.

Renewable Energy

01 Business coordination

MPS is engaged in the development and operation of renewable energy power generation projects. Our business comprehensively covers all stages from securing a site and power plant construction, to management over 20-year project periods, and the removal of facilities after the termination of projects. We utilize idled or unused land owned by companies or local governments as projects sites, and work with EPC contractors to select, design, and construct optimal facilities. While collaborating with various partners, we also coordinate among all project stakeholders, including intermediation among the various parties involved.

02 Contributing to the society through power generation

Through our role in power generation projects based on the use of clean, renewable energy, we are contributing to global warming countermeasures and transformation of the energy structure. In addition, we will promote and evolve these projects into sustainable business that can contribute to provision of solutions to various needs, including investment opportunities for pension funds and financial institutions, the use of land vacated due to population decline and urbanization, and industry revitalization through the introduction of alternative energy technologies.

03 Renewable energy initiatives

In addition to solar power generation projects, we are pursuing opportunities for the creation of business focused on other types of renewable energy, such as wind power, small-scale hydropower, biomass, and geothermal binary systems. Using a fund model based on the utilization of long-term operating funds, we aim to contribute to the development of a future energy strategy for Japan.

Corporate Profile

Name	Mitsui & Co. Project Solutions, Ltd. (Abbreviation : MPS)
Date of Establishment	April 1, 2007
Representative	Tadateru Tanigaki, President and Chief Executive Officer
Number of Employees	279 (as of April 2025)
Head Office	Shiodome Sumitomo Bldg. 26F, 1-9-2, Higashi-Shimbashi, Minato-ku, Tokyo, 105-0021, Japan
Number of Offices	14
Capital Stock	Yen 3.6 billion
Major Business Areas	We are providing solutions for the infrastructure necessary for better global environment and economic and social development in the fields such as electric power, steelmaking, transportation, chemicals, renewable energy and decarbonization.
Shareholder	Mitsui & Co., Ltd. 100%
Major Banks	Sumitomo Mitsui Banking Corporation/Mizuho Bank, Ltd./MUFG Bank, Ltd.

History

APR 2007	Mitsui & Co. Project Corporation, Mitsui Bussan Plant & Project Corporation, Mitsui & Co. Power Systems Corporation and Mitsui Bussan Transportation System Co., Ltd. have merged and established Mitsui & Co. Plant Systems, Ltd.
NOV 2008	Moved the head Office to Higashi-Shimbashi, Minato-ku, Tokyo
NOV 2010	Moved the head Office to 26 floor of Shiodome Sumitomo building.
MAR 2011	Moved Kurashiki Office
MAR 2012	Moved Hiroshima Office
NOV 2014	Moved Sapporo Office
DEC 2014	Moved Fukuoka Office
APR 2014	Established Futtsu Site Project Office
NOV 2015	Moved Oita Office
JUL 2016	Closed Jakarta Office due to completion of project
DEC 2016	Closed Ube Office
APR 2017	Changed Kurashiki Office to West Japan Office Closed Yamaguchi Office
APR 2018	Moved West Japan Office to Hiroshima and established Kurashiki liaison Office
OCT 2024	Changed trade name to "Mitsui & Co. Project Solutions, Ltd."
MAR 2025	Increased the capital stock to 3.6 billion yen.
